

Broad, Balanced and Inclusive Curriculum

Our online alternative provision is committed to providing an inclusive, holistic, and innovative learning environment that empowers young people to reach their full potential. We believe that every learner deserves access to a high-quality education that is tailored to their needs and aspirations.

Our curriculum is designed to foster personal growth, academic achievement, and social development. By adopting a holistic approach, we address the whole person, supporting their emotional, social, and mental well-being alongside their academic progress. Through innovative teaching and learning strategies, we create engaging and relevant experiences that inspire curiosity and a lifelong love of learning in an online space.

Our inclusive ethos ensures that all learners, regardless of their background or challenges, feel valued, respected, and supported. We create a safe and welcoming online community where learners can thrive and develop the skills and knowledge necessary to succeed in education, employment, and life.

Balanced Curriculum

- Subjects
- Core

- Other
- PE
- Music
- Geography
- History
- Art
- Careers
- British Values
- Prevent
- PSHE
- Internet Safety

Intent statements

English: At EDClass, our online English curriculum is designed to equip KS3 and KS4 learners with the confidence, critical thinking, and creativity to excel in language and communication. By immersing learners in a diverse range of texts, we foster a lifelong love of learning and develop the essential literacy skills needed for success in the modern world. We believe that English education is transformative, empowering learners to become active, engaged citizens who can articulate their ideas, understand the world around them, and shape their own futures.

Maths: The online Maths curriculum at EDClass is designed to empower learners with the mathematical skills and confidence needed to succeed in their chosen paths. We recognise that our learners may have faced challenges in traditional classroom settings and may have gaps in their prior learning. Our online platform offers a flexible and supportive environment to address these needs and ensure all learners progress.

Science: Our online science curriculum is designed to ignite curiosity and foster a lifelong passion for scientific inquiry. We aim to equip learners with a strong foundation in scientific knowledge, understanding, and practical skills. Through engaging and interactive online experiences, we cultivate analytical thinking, problem-solving, and investigative abilities. Our curriculum is underpinned by a commitment to developing scientifically literate individuals who can make informed decisions and contribute positively to society.

By studying biology, learners will develop an understanding of living organisms, fundamental processes and the importance of sustainability. The study of chemistry will give learners an understanding of matter, chemical reactions and the composition of the Earth and atmosphere. Within physics, learners will explore a wide range of ideas, from the development of the universe, to explaining the motion and behaviours of matter and new emerging technologies related to energy resources and conservation.
